

# The Oceans and Rapid Climate Change: Past, Present, and Future

---

Geophysical Monograph Series Volume 126

Edited by Dan Seidov, Bernd Haupt, and Mark Maslin

## TABLE OF CONTENTS

### Preface

*Dan Seidov, Bernd J. Haupt, and Mark Maslin*

### Ocean Currents and Change--An Introduction

*Eric J. Barron and Dan Seidov*

### Part I: Data and Climate Models: Windows to the Past.

Synthesis of the Nature and Causes of Rapid Climate Transitions During the Quaternary (A Review)

*Mark Maslin, Dan Seidov and John Lowe*

The Big Climate Amplifier Ocean Circulation - Sea Ice-Storminess-Dustiness-Albedo

*Wallace S. Broecker*

Stochastic Resonance in the North Atlantic: Further Insights

*Richard B. Alley, S. Anandkrishnan, P. Jung, and A. Clough*

Late Holocene (~ 5 Cal Ka) Trends and Century-Scale Variability of N. Iceland Marine Records: Measures of Surface Hydrography, Productivity, and Land/Ocean Interactions

*John T. Andrews, Greta B. Kristjansdottir, Aslaug Geirsdottir, Jorunn Hardardottir, Gudrun Helgadottir, A. Sveinsbjorndottir, Anne E. Jennings, and L. M. Smith*

Changes of Potential Density Gradients in the Northwestern North Atlantic During the Last Climatic Cycle Based on a Multiproxy Approach.

*Claude Hillaire-Marcel, Anne de Vernal, Laurence Candon, Guy Bilodeau, and Joseph Stoner*

Lower Circumpolar Deep Water Flow Through the SW Pacific Gateway For The Last 190,000 years: Evidence from Antarctic diatoms

*Catherine E. Stickley, Lionel Carter, I. Nick McCave, and Phil P. E. Weaver*

Modeling Abrupt Climatic Changes During the Last Glaciation

*Michel Crucifix, Philippe Tulkens, and Andre Berger*

Simulating Climates of the Last Glacial Maximum and of the Mid-Holocene: Wind Changes, Atmosphere-Ocean Interactions, and Tropical Thermocline

*Andrew B. G. Bush*

## **Part II. Ocean and Climate Models: Bridging Past, Present and Future**

Ocean Bi-Polar Seesaw and Climate: Southern Versus Northern Meltwater Impacts

*Dan Seidov, Bernd J. Haupt, Eric J. Barron, and Mark Maslin*

Glacial-To-Interglacial Changes of the Ocean Circulation and Eolian Sediment Transport

*Bernd J. Haupt, Dan Seidov, and Eric J. Barron*

On the Response of the Atlantic Ocean to Climatic Changes in High Latitudes: Sensitivity Studies with a Sigma Coordinate Ocean Model

*Tal Ezer*

The Effects of Vertical Mixing on the Circulation of Aabw in the Atlantic

*Igor V. Kamenkovich, and Paul J. Goodman*

The Influence of Deep Ocean Diffusivity on the Temporal Variability of the Thermohaline Circulation

*Kotaro Sakai, and W. Richard Peltier*

The Climatic Influence of Drake Passage

*Halldor Bjornsson, and J. R. Toggweiler*

Stability and Variability of the Thermohaline Circulation in the Past and Future: A Study with a Coupled Model of Intermediate Complexity

*Andrey Ganopolski, and Stefan Rahmstorf*

The Future of the Thermohaline Circulation – A Perspective

*Thomas F. Stocker, Reto Knutti, and Gian-Kasper Plattner*

---
